

Online Stakeholder Working Group Meeting

Overview

Date	28.04.2020
Location	ZOOM platform
Aim of the event	Technical testing of opportunities for online communication, introduction to the current and future events of the BE-Rural project and to the subsequent activities in the Strumica region.

Short summary

The need for online work is inevitable due to the new situation with COVID-19. Physical events and seminars have been cancelled, so such way of working is the only opportunity to continue the dynamics of the project BE-Rural. Hence, there was a necessity for a meeting test with the stakeholder working group. The group was made up of stakeholders from the Strumica region. They were thus the first target group to get acquainted with this new form of communication. In order to continue the capacity building for all participants, it was important during the meeting to identify possible problems, if any, and to address them in a timely manner.

The meeting took place on the *ZOOM* platform. Eight participants attended. During the discussion, everyone gave out positive feedback about the functions and user-friendliness of the online tool. At that point, no major problems were identified for the online execution of future events.

The next events planned in the Strumica region are the two seminars for knowledge exchange and capacity building for public sector organisations. The seminars were originally scheduled for March and April but have been rescheduled for May and July. To discuss details of the organisation of these upcoming events, the stakeholder working group will convene again at the next meeting scheduled on 07.05.2020, 10:00 (CEST).
