

Educational event: BE-Rural, Bioeconomy and Circular Economy

Overview

Date	Tuesday, 2 March 2021
Location	Bulgaria, Stara Zagora, "Knyaz Simeon Tarnovski" Trade High school
Aim of the event	This educational event under the BE-Rural project was designed to familiarize students from the final school grade and local teachers at a high school located in the Stara Zagora city with the project aims and activities and mostly with the notion of bioeconomy and circular economy, based on the educational materials developed by the UK project partner.

Short summary:

A third consecutive educational event took place in the OIP target region in Bulgaria under the BE-Rural project on 2 March 2021. In spite of the pandemic in the country, the event was held in presence in the school premises of the local high school of trade, but it had a hybrid form as well because some classes of students could follow the presentation from other class rooms through the internal electronic system of the school.

The target group were students at the age of 17-19 years old from a local high school of trade in Stara Zagora. 70 participants took part in this hybrid and face-to-face lecture presented by a school teacher.

The high school students were familiarized with the activities and ideas of the BE-Rural project specifically and the meaning of the bioeconomy, but also its connection with the circular economy, with some examples of bio-based products.

This lecture was the first time those students heard about the bioeconomy and its features in the context of the BE-Rural project. It proved to be a difficult subject for these teenagers, but the novelty presented here helped opening their eyes to the bioeconomy in the present and future world. It was a good step for disseminating information and enriching the knowledge among more young people about the benefits and advantages of the bioeconomy.

Participants

Name	Surname	Organisation	Stakeholder Category
Dahidarka	Ivanova	"Knyaz Simeon Tarnovski" Trade High school	Academia
