

FIRST KNOWLEDGE EXCHANGE AND CAPACITY BUILDING THEMATIC SEMINAR OIP Covasna

Overview	
Date	19 March 2021 (12:00 -13:30)
Location	Online
Aim of the event	Familiarization of local actors with the stages of preparation of regional strategies oriented towards bio-based industries, in the context in which Romania is represented in simultaneous projects that focus on bioeconomy strategies at national and regional level.

The event entitled, Bioeconomy - Regional Strategies in the European Union, was organized by the Institute of Economic Forecast (IPE) of the Romanian Academy, within the BE-Rural project, in order to support the exchange of knowledge and strengthen the capacities of local economic actors. The event is part of the series organized so far within the BE-Rural project, in order to prepare regional strategies aimed at organic industries.

Benefiting from the fact that in parallel another HO 2020 project is underway, BIOEASTsUP under the auspices of the BIOEAST initiative, we invited to participate as speakers, their representatives. The synergies created with these similar projects will contribute to broadening the horizon for the actors involved in strengthening the regional bioeconomy. Especially, that the attraction of the participants in this event was done with the involvement of the Association of SMEs from Covasna - ASIMCOV, an association that is involved in the implementation of the project, since its launch.

It should be noted that the seminar brought together specialists in fields related and adjacent to the bioeconomy, members of ongoing national and European projects dedicated to promoting the bioeconomy in rural areas. This complex structure of the audience, similar to a National / Regional HUB of Bioeconomy creates the premises for the consolidation of such entities in our country.

Given these objectives, the community will continue its concerns, embodied in various ongoing national and European projects, and the organizers will collect ideas for further studies in future events, such as meetings with the stakeholder working group (SWG) or organizing the pop-up store event, within the BE-Rural project.

Participants		
Carmen Pauna	Institutul de Prognoza Economica (IPE)	Research
