

SECOND KNOWLEDGE EXCHANGE AND CAPACITY BUILDING THEMATIC SEMINAR OIP Covasna

Overview	
Date	24 March 2021 (14:00 -15:30)
Location	Online
Aim of the event	Favouring the transfer of knowledge, for the promotion of the bioeconomy in Covasna county - selected as a regional innovation area within the BE-Rural project. The education system is a vector for transmitting a responsible attitude towards the environment and towards the ecological limits of the resources used, regardless of their nature. The audience consisted mainly of representatives of academia and the education system.

The event entitled - Thematic Session aimed at raising capacity on the UN's SDGs; a perspective of an H2020 project: Bio-based strategies and roadmaps for enhanced rural and regional development in the EU (BE-Rural), was organized by Institute for Economic Forecasting as Covasna OIP Facilitator - as a side session of the online international conference - Science Evidence-Based Decision Making Approaches for the Implementation of SDGs in the Black Sea Region (conducted in the time interval 11.00 -15.30).

This section, in the spirit of the whole conference, provided a framework for debate and exchange of ideas, presentation of best practices to identify new directions to be followed for the design of policies aimed at implementing the Sustainable Development Goals (SDGs) in our country and adjacent areas in the Black Sea area.

The event favoured the transfer of knowledge, for the promotion of the bioeconomy in Covasna county - selected as a regional innovation area within the BE-Rural project. The area is well known for preserving traditions and initiatives related to achieving the SDGs. In this context, we note the participation in the event of Green Energy Cluster representatives, who were awarded at the Sustainable Development Gala on November 25, 2020, organized by the Department for Sustainable Development of the Romanian Government, in partnership with the Association of Small and Medium Enterprises in Covasna County (ASIMCOV). Other participants from Covasna were representatives of high school, vocational and university education as well as representatives of civil society (various associations) or the business environment, such as ASIMCOV. In fact, attracting representatives from academia and education at this event was done with the involvement of ASIMCOV, an association that is involved in the implementation of the project, since its launch. In addition to the people from Covasna, other Romanian participants were also present at this session, as well as foreigners.

The session aimed to present the link between the bioeconomy and the SDGs, and the Institute for Economic Forecasting as Covasna OIP Facilitator will continue with other thematic seminars, designed to form the capacity of local actors to contribute to strengthening the bioeconomy in the Covasna area.
