

2nd Educational Event in OIP Covasna, Romania

Bioeconomy - What is it

Overview	
Date	11 March 2021 (11:00 -12:00)
Location	Online
Aim of the event	Raising awareness to issues related to bioeconomy, biodegradable resources, and waste management. Assessing the knowledge gap on topic related to bioeconomy, bioproducts and markets.

The online event was organised by IPE team (as OIP Facilitator in the Covasna Region, Romania) along with the help of ASIMCOV (Association of Small and Medium Enterprises in Covasna County) and some representative of educational entities in Covasna: The School Inspectorate (Agency) from Covasna, Constantin Brancusi Technological Highschool Sfantu Gheorghe, by the occasion of a semestrial school period called "Saptamana Altfel meaning "School – something different".

2nd Educational Event was dedicated to pupils coming from Constantin Brancusi Technological Highschool Sfantu Gheorghe, X and XI classes. There were also teachers attending from this High School: the Director and the teachers who advises / supervises the extracurricular activities carried out by the students of the respective classes.

Most attendees were pupils in the X and XI classes from the Constantin Brancusi Technological Highschool Sfantu Gheorghe, and their teachers. Besides the IPE members there also participated some representatives from ASIMCOV.

Our main target was to increase children's awareness about the topic. The subject was well received by the participants and they showed interest in the subject. It was decided that this topic of discussion will continue during their homeroom class. Some of the children expressed their willingness to talk about the topic with their friends and colleagues that could not attend this event.

The attendees presented interest in the subject; they did have questions about it. As an event dedicated for pupils/students, for sure it will be something to think about in the future. The fact that we also provided them with ideas about games for sure was a success. Overall, if we want to have any form of success increasing their awareness on this topic, 1-2 educational events is not enough. This must become part of their curricula.
