

3rd Educational Event in OIP Covasna, Romania

Introduction to Bioeconomy

Overview	
Date	12 March 2021 (11:00 -12:00)
Location	Online
Aim of the event	Raising awareness to issues related to bioeconomy, biodegradable resources and waste management. Assessing the knowledge gap on topic related to bioeconomy, bioproducts and markets.

The online event was organised by IPE team (as OIP Facilitator in the Covasna Region, Romania) along with the help of ASIMCOV (Association of Small and Medium Enterprises in Covasna County) and Constantin Brancusi Technological Highschool Sfantu Gheorghe, by the occasion of a semestrial school period called "Saptamana Altfel meaning "School – something different".

3rd Educational Event was dedicated to pupils coming from Constantin Brancusi Technological Highschool Sfantu Gheorghe, IX and X classes, with vocational profile. There were also teachers attending from this High School: the Director and the teachers who advises / supervises the extracurricular activities carried out by the students of the respective classes.

Most attendees were pupils in the IX and X classes with vocational profile, from the Constantin Brancusi Technological Highschool Sfantu Gheorghe, and their teachers. Besides the IPE members there also participated some representatives from ASIMCOV and one from Iasi University.

Considering the status (pandemic), Romanian schools, high schools and universities were closed and moved the education process to an online format. This has been going on now for 3 whole semesters and will continue so probably for at least one more. This acted like a good framework for presenting and talking about different issues outside the curricula (which is mandatory). Both pupils/students and teachers/professors were already accustomed to the online format. We found this a very good opportunity to tackle bio related issues. All children are well used to online presentation by now and were very interested in the games we provided them. Some of the teachers said that this is better suited when they will return to classes, so that they can print the games and monitor the interaction between the children.
